

Abstract

The snowboard binding interface is a comfort- and safety-solution, which can be mounted under any binding (not boot) on any kind of ski, skwal or snowboard and which can also be used as rotation torque measure device for the maximum individual generate able muscular forces in the foot ankle of the sportsman. Thus, the interface cannot only be interchanged in a regular binding with safety release, step-in and step-out with a pull-out lever, but it has also an always working stop-break and a lock attach able loop with an electric circuit or even microchip and transponder with a number, which can be saved with the name on a server in the internet as ultimate theft-lock-solution.

Index of the reference signs

interface 1
top-part 2
bottom part 3
stop-break bar 4 with poles
screws 5
round fixing-ground-plate 6 (with 4x4 or 3D Norm)
stop (housing) 7
cross-shaped opening 8
round fixing-ground-plate 10
screw 11
star-shaped grooves 12 of the fixing-ground-plate
openings 13 of the spring box
star-shaped grooves 14 of the spring box
engaging element or spring box 15 of the release-mechanism
clamping mechanism or adapter 16 of the release-mechanism
thread winding holes 17
release-mechanism 18
inserts 19
power springs 20
frame 21
pin 22 with round shaped endings
holes respectively housings 23
pressure plate 24
screw 25 with ring in the thread 25 b
pressure plate 26
fixing frame 27 or u-profile
turn able groove plate 28
fixed groove plate 29
u-lever 30
axis 31
butterfly shaped release trough 32
hole 33 for a spring in the turn able groove plate 28
plate spring 34
central hole 35 in the spring box 15
insert 36 of the fixing-ground-plate 10
loop 37
turning-clapping lever 38
(alpha-numeric- or bar-) code 39
Internet-list 40 of the alpha-numeric- or bar- code 39
suspension plate 41
joint 42 of suspension plate 41
rubber rings respectively spacer washers 43 as damping means
toe fixing wire 44
heel fixing wire 45
screw 49
spring power balance 50
wire 51
kink 52
opening 54 for stop break bar 4
long shaped interface plate 55

central enlargement 56 for the release mechanism 16
fixing or mounting means 57 and 58
parallel long-holes 59
toe mechanism 60
u-clamping profile 61
heel mechanism 62
stop-break turning point 70
stop hook 71
multiple holes 72
ring 76
opening 77
conic shaped borders 78
frame of opening 79
long-holes 80
central 3D pattern 81
top right hole 82
4x4 pattern 83
high-back 90
axis 91
move able tapes 92
fixing hook 93
adjustment screws 99
lock 100
pring box 101
pins round head 102
release lever 103
axis 104
hole or opening 105
hole for touring binding pins 106
power plate 107
wing 108
